

SSN College of Engineering, Kalavakkam
Department of Computer Science and Engineering
VI Semester - CSE 'C'
UCS1611 INTERNET PROGRAMMING LAB

Academic Year: 2020-2021

Batch: 2018-2022

Faculty: Dr. A. Beulah

Due Date: 08.4.21, 13.4.21

Exercise 6: Autocomplete Feature using AJAX

Develop an AJAX program that implements the Autocomplete feature for filling the country names as given below:

The image shows a web form with a label "Country :". To the right of the label is a text input field containing the letter "n". Below the input field is a dropdown list of country names. The names listed are: Namibia, Nauru, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, and Norway. The "Nepal" option is currently selected and highlighted with a darker orange background.

For Example, when N is entered all the names of the country starting with “N” should be listed in drop-down list for user’s easy selection. When “Na” is typed only “Namibia” and “Nauru” should be listed for selection. Use Servlet for server side scripting. Use MySQL database to store the countries names.
